

## LOWE & FLETCHER and EURO-LOCKS

LOCKING SYSTEMS FOR INDUSTRY

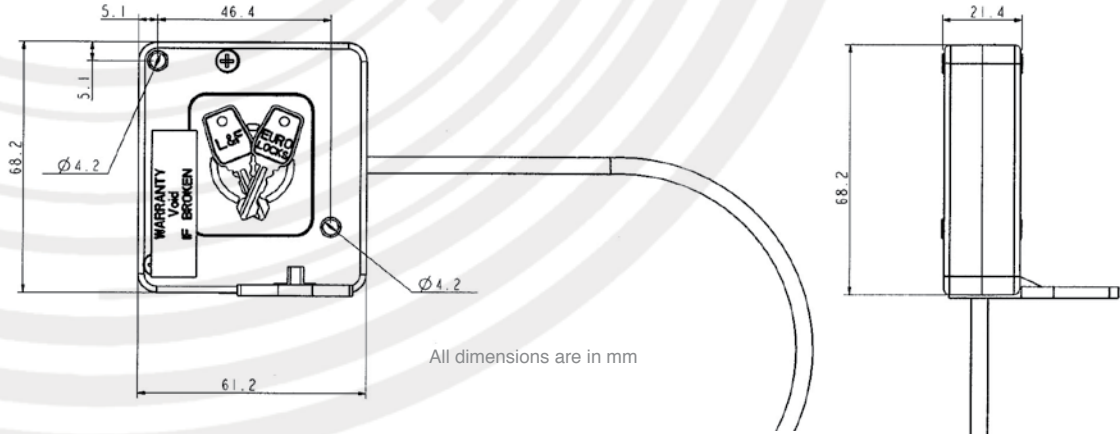

### Description

The Electronic Latch is a versatile and reliable addition to any access control system and simply requires an electronic pulse to unlock the unit. It can be easily installed into existing wooden and metal enclosures for use in applications such as personnel lockers and office furniture. With a tough ABS moulded body, mechanical key override and growing range of striker designs to choose from, this slam-to-lock latch is the clear choice for safety critical installations.
